

MIRODO SCRIPT

For Launch Assembly

This presentation has been created to help you deliver an exciting and engaging launch assembly for your pupils and fellow teachers!

Slide 1 - Front Slide

Slide 2 - What is Mirodo?

- Mirodo is an award-winning, all-in-one learning tool specifically designed for Years 3-6, and Year 7 catch up, to help build key skills in English, Maths, and Science.
- Mirodo can be used independently at home and also at school, helping pupils to boost confidence and progress.
- The key is short and regular practice on Mirodo to help build understanding across all topics.

Slide 3 - How Do You Log In?

- Each pupil will receive a login letter/ slip (if not already received) which contains their unique username and password.
- Mirodo is a web-based platform, compatible with desktops, laptops and tablets.
- Pupils are able to log in at home and at school.
- We highly recommend pupils use Google Chrome or Firefox browser when accessing Mirodo, as these are the most compatible with the platform.
- To log in, pupils need to go to <https://app.mirodoeducation.com/login> and click on 'Login' at the top left side of the page.
- If pupils forget their password, they will need to contact their class teacher.

Slide 4 - Independent Practice

- Pupils can use Mirodo to practice topics that they have covered in school with their teacher.
- Once your pupils start to use the platform, Mirodo will recommend daily challenges. These tailored topics will help to boost confidence and build understanding.
- Pupils have access to a bank of unique practice questions covering Maths, English and Science.
- Within each practice topic, there is a help guide to 'assist' pupil learning along with a video to recap.

Slide 5 - Independent Practice continued

- We recommend at least 20 minutes minimum of practice every day, which is the same as one daily Maths and English task.

Slide 6 - Building in 20 minutes a Day

- Mirodo will work best if pupils make it part of their everyday routine.
- Share ideas of when they could spend 20 minutes on Mirodo and ask them for their ideas (before breakfast, breakfast club/ afterschool club, after dinner ect).

Slide 7 - Tasks Set By Your Teacher

- Show the task area within the pupil account.
- This is where pupils can access tasks that have been set by their teacher, this may include any homework, revision, GO-Live lessons, or tests.
- The due date is shown on each task set. This is automatically updated as "overdue," if pupils don't submit their work on time. Pupils can complete a task after the due date, but this will be marked as a late submission.
- Pupils can also see the tasks they have completed under the "completed" tab.

Slide 8 - Tests Set By Your Teacher

- When teachers set a practice test, this will show up as a task under the 'task' tab for pupils.
- Pupils will only have access to tests once they have been set by their class teacher- these cannot be accessed independently.

Slide 9 - Practice Progress and Test Results

- Pupils and their parents can view a real-time report under the 'progress' tab.
- Results are broken down into each subject area and pupils can view topics they are doing well at, as well as view their individual learning goals.
- Pupils can access an overview of their understanding, view their progress, and start to address learning gaps.

Slide 10 - Video Lessons

- All pupils will have access to a video library on key topics.
- Mirodo will automatically recommend videos for each pupil to watch based on their individual learning goals.
- Pupils can access these videos at any time, as a useful way to recap a topic or even as help with their homework.
- Pupils can also be assigned videos to watch by their teacher, as an independent task or attached to a homework task. These will appear in the 'tasks' area of their account.

Slide 11 - Collect Rewards and Trophies

- Pupils can earn coins and gems by using the platform.
- The coins can be used to customise their account through the shop section.
- The gems count towards the class leaderboard (if the teacher has set this up).
- *Depending on teacher preference* a class leaderboard can be turned on. This will show the pupils who have earned the most gems.

Slide 12 - Collect Rewards and Trophies continued

- Pupils can view the class leaderboard, along with their Goals and Trophies, under the 'Rewards' tab in their account.
- Trophies are set by teachers and can be linked to tasks that have been set.
- Pupils can work towards bronze, silver and gold levels on various goals and they can earn additional coins and gems once these are achieved.
- The class teacher also has access to a selection of stickers. These hold a special code that can be used to earn more coins.

Slide 13 - Support

- If pupils (or teachers) experience any technical issues or wish to provide feedback, they are able to click on the 'share feedback' button displayed on the right-hand side of their account at any time.
- Teachers and parents can email us at support@mirodoeducation.com with any queries.

Slide 14 - Our top tips

- As each Mirodo account is designed to be unique for every pupil's learning level, it is important that pupils complete the questions on their own and don't get help from peers or parents. If they do get too much help, things may get too tricky!
- Keep practising - hard work and effort is rewarded!
- Go to 'Lessons' and watch videos to help you learn.
- Don't rush to complete tasks and goals. We recommend short and regular practice.

End of Presentation
